

EXPERIMENT – 4

4) Visual Representation of Mobile Network Protocol Stacks Using Figma

AIM

To create a visual representation in Figma that highlights the key elements and layers of mobile network protocol stacks.

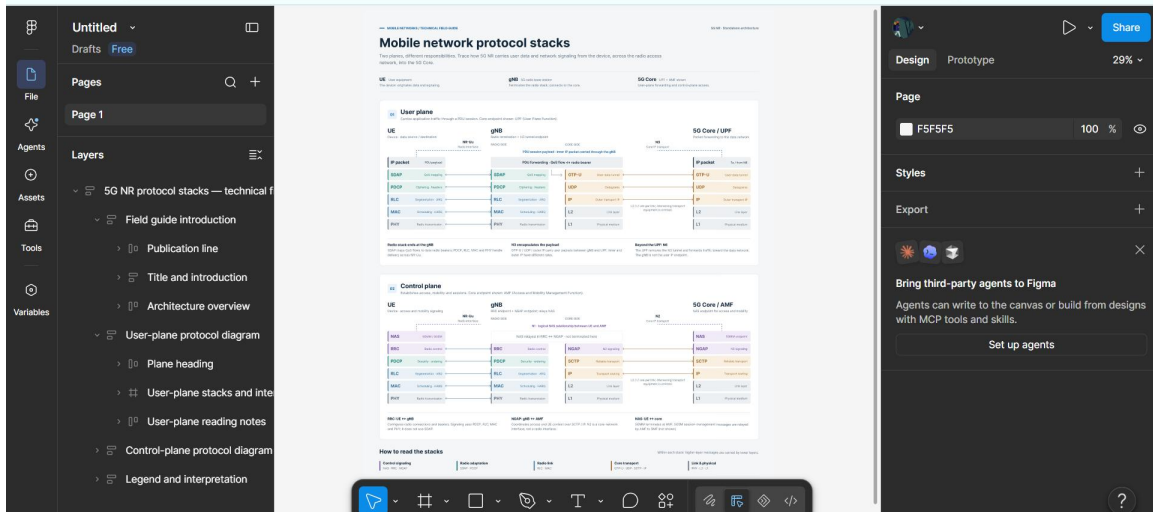

PROCEDURE

1. Open Figma and create a new design file.
2. Create a suitable frame for the mobile network protocol stack diagram.
3. Add separate layers or blocks for the major protocol stack elements.
4. Represent the application, transport, network, data link, and physical layers using separate sections.
5. Add important mobile communication protocols such as HTTP/HTTPS, TCP/UDP, IP, LTE/5G protocols, and radio interface components.
6. Use arrows to show the flow of communication between the layers.
7. Add labels, headings, and simple icons where required.
8. Arrange and align all elements neatly.
9. Apply suitable colors, fonts, and spacing to make the diagram easy to understand.
10. Save the completed design in Figma.

INPUT

Figma design tool, protocol stack information, layer names, protocol names, and mobile network communication concepts.

OUTPUT

RESULT

Thus, a visual representation of the key elements of mobile network protocol stacks was successfully created using Figma.
