

Figma – Interactive Cellular System Diagram

Aim:

To create an interactive cellular system diagram using Figma, showing the main components of a basic cellular system and their connections.

Procedure:

1. Open Figma and create a new design file.
2. Create a suitable frame for the cellular system diagram.
3. Draw cells using circular or hexagonal shapes to represent coverage areas.
4. Add mobile users/devices inside the cells.
5. Add Base Transceiver Stations (BTS) for each cell.
6. Add the Mobile Switching Center (MSC) and Core Network.
7. Connect Mobile Users to BTS, BTS to MSC, and MSC to the Core Network using arrows.
8. Add suitable labels, icons, and colors to identify each component.
9. Use the Prototype option in Figma to make the components interactive.
10. Add interactions so that clicking a component displays or navigates to its information.
11. Click Present/Play to test the interactive diagram.

Input:

Figma design tool, cellular system component information, shapes, icons, text labels, and connection arrows.

Output:
